

Chicago Infrastructure Trust Meeting - January 27, 2016

1 CHICAGO INFRASTRUCTURE TRUST
2 BOARD OF DIRECTORS MEETING

3

4 BEFORE:

5 CHAIRMAN KURT SUMMERS
6 MS. LESLIE M. DARLING
7 MR. GEORGE MARQUISOS
8 MR. SCOTT FALK
9 MR. TOM BUDESCU
10 MS. MARYSUE BARRETT
11 MR. DAMON SILVERS
12 MS. KYM HUBBARD
13 MR. CARL LINGELFELTER
14 MR. MIGUEL ZARATE
15 MR. MICHAEL SCOTT, JR.
16 MR. MATT O'SHEA

**CERTIFIED
TRANSCRIPT**

17 The meeting of the Chicago Infrastructure
18 Trust, before the Chicago Infrastructure Trust
19 Board of Directors, taken before Julie Walsh,
20 CSR, and notary public of Lake County, Illinois,
21 on the 27th day of January, 2016, at the
22 Metropolitan Planning Council, 140 South Dearborn
23 Street, Suite 1400, Chicago, Illinois, beginning
24 at approximately 1:35 p.m., pursuant to notice.

21
22 REPORTED BY: JULIE WALSH, CSR

24

Chicago Infrastructure Trust Meeting - January 27, 2016

1 (Whereupon the meeting
2 commenced at 1:35 p.m.)

3 CHAIRMAN SUMMERS: Well call this meeting of
4 the Chicago Infrastructure Trust to order. The
5 first order of business is the approval of
6 minutes from the August 14th meeting. Any
7 questions on the minutes? They should have been
8 circulated to everyone. Nod if there is a motion
9 to approve.

10 MS. HUBBARD: So moved.

11 MR. LINGENFELTER: So moved.

12 CHAIRMAN SUMMERS: Moved by Mr.
13 Lingenfelter.

14 MS. HUBBARD: Second.

15 CHAIRMAN SUMMERS: Second by Miss Hubbard.
16 All in favor?

17 (Chorus of ayes.)

18 CHAIRMAN SUMMERS: Any opposed? Great.
19 Next is the proposed board calendar. So I think
20 these dates have been circulated with all of you
21 and your staffs and should be acceptable.

22 MS. DARLING: We are still working on a
23 couple of finalizations, but this is the planned
24 calendar for right now. I am waiting for a

Chicago Infrastructure Trust Meeting - January 27, 2016

1 couple of additional responses, but I will be
2 circulating a final as soon as possible.

3 CHAIRMAN SUMMERS: Got it. All right. So
4 the sooner anybody -- if there are any issues,
5 the sooner we get them to Leslie, the better.

6 I think the next is new members of the
7 team. Want to introduce those?

8 MS. DARLING: We have had one brand new
9 addition to our team that I am thrilled to
10 welcome. First is George Marquisos who is to my
11 left. He has joined us as a Managing Director of
12 the Infrastructure Trust. He came to the CIT
13 most recently from the Public Building Commission
14 where he was a senior project manager there. He
15 has worked with the CIT and handled the Retrofit
16 One project on behalf of the PBC, so he's very
17 familiar with the Infrastructure Trust.

18 He is a proven project manager. He
19 has over 20 years of private and public
20 experience. He has done so much work that we
21 need at the Infrastructure Trust. He knows how
22 to do capital plans, write bid documents. And he
23 is one of the City's experts on the Energy
24 Efficiency Project which is the kind of work that

Chicago Infrastructure Trust Meeting - January 27, 2016

1 we are doing with street lighting. He is
2 managing our street lighting project for the CIT.
3 I'm thrilled to welcome him. So I hope you'll
4 join me in welcoming him and getting to know him
5 as soon as you can.

6 The second person who starts with us
7 and Monday is Patricia Dominguez who is here on
8 her lunch hour and sitting in the back. Raise
9 your hand, Patty. Patty is going to be our
10 Manager of Administrative Services and a project
11 coordinator for us.

12 Patty and I were colleagues at the
13 City of Chicago. I have worked with her for many
14 years. She is really a skilled administrator and
15 really is going to make this board meeting -- you
16 will now have a lot better information going
17 forward and she will make it very easy to be
18 working with the CIT going forward. So I know
19 you will enjoy working with both George and
20 Patricia as much as I do. So thank you for
21 welcoming them.

22 CHAIRMAN SUMMERS: Great. Welcome guys. I
23 don't know, Leslie, if you were planning to
24 particularly given George's background and

Chicago Infrastructure Trust Meeting - January 27, 2016

1 expertise and what he's working on; but if
2 everyone could carve out some time to visit with
3 George and get to know him and get his thoughts
4 on things and provide some feedback would be a
5 good thing to do.

6 MR. MARQUISOS: I welcome that.

7 CHAIRMAN SUMMERS: All right. The next on
8 the agenda is board officer appointment which I
9 expect to be very controversial.

10 MR. LINGENFELTER: I don't remember --

11 CHAIRMAN SUMMERS: You don't remember -- Do
12 you remember when we called you and said
13 congrats.

14 MR. FALK: Double the pay.

15 MS. DARLING: For you triple.

16 CHAIRMAN SUMMERS: Right. So everyone
17 should have received a resolution to be adopted
18 electing our secretary treasurer as Carl
19 Lingenfelter a member of the board. Any
20 questions about this, Scott, just in 30 seconds,
21 60 seconds on why they need to do it.

22 MR. FALK: So the bylaws and the ordinance
23 from the City of Chicago creating the Trust
24 require that there be an officer of the board

Chicago Infrastructure Trust Meeting - January 27, 2016

1 entitled secretary treasurer. Typically -- it's
2 a little unusual. Typically the secretary
3 treasurer would be an officer of the Trust not of
4 the board, but that's how it's been historically.
5 You'll replace Diane Ferguson who did a fine job
6 in that role previously. And so it's a board
7 officer.

8 CHAIRMAN SUMMERS: Great. Any questions on
9 the resolution for the secretary treasurer? Is
10 there a motion by anyone other than Mr.
11 Lingenfelter?

12 MS. HUBBARD: So moved.

13 CHAIRMAN SUMMERS: Moved by Miss Hubbard.
14 Second by Mr. Zarate. All those in favor.

15 (Chorus of ayes.)

16 MR. LINGENFELTER: I'll abstain.

17 CHAIRMAN SUMMERS: Congrats. Triple the
18 pay. We should also welcome a new member of our
19 advisory board, Alderman Scott, who was appointed
20 by the Mayor this week to join our advisory board
21 which as everyone knows is a collection of folks
22 who are meant to provide expertise and support to
23 the staff and to the board in various areas. And
24 his background working with some of our sister

Chicago Infrastructure Trust Meeting - January 27, 2016

1 agents here and effectively our clients in many
2 cases is an exciting addition for all of us and
3 will contribute a lot to the work of the Trust.
4 So welcome.

5 MR. SCOTT: Thank you.

6 CHAIRMAN SUMMERS: This is the part where
7 you guys are supposed to grill him and haze him.
8 Okay. Next is the benefits.

9 MS. DARLING: Sure. When we last met in
10 August we talked about how important it was for
11 the CIT to have an appropriate benefit package to
12 offer employees to both retain and recruit. I
13 have been lucky enough to recruit two employees
14 so far. And I hope as we grow that we'll be able
15 to recruit many more, but it is important for us
16 to have -- to have an appropriate benefit
17 package.

18 I am still working on health benefits,
19 but in the meantime I have been able to secure a
20 401K plan for the CIT. I did a tremendous amount
21 of research on this and have made the -- or want
22 to make the recommendation today that we go with
23 a company called Betterment for Business. They
24 offered a turnkey solution that's affordable and

Chicago Infrastructure Trust Meeting - January 27, 2016

1 very easy to administer. It's sort of a one-stop
2 shop. Much of it can be done through the
3 internet. There is no cost to the Chicago
4 Infrastructure Trust.

5 As an early adopter to their program,
6 they agreed to waive their \$1500 annual fee.
7 Typically for small businesses with a -- with a
8 401K plan, you have an administrator. There is
9 also a large expense for record keeping,
10 etcetera. All of that is wrapped into what
11 Betterment is providing for us.

12 There is a low cost to participants,
13 it's .7 percent or less and that includes fees
14 for investments which is also very unusual. And
15 the fee includes advice, trades, fund expenses
16 and account administration. So it's an all-in
17 turnkey solution for us. And it -- importantly
18 for me requires very limited burden on
19 administrative staff at the CIT which was
20 important for me. So this is my recommendation
21 and I am happy to answer any questions. Any
22 questions?

23 CHAIRMAN SUMMERS: No. The only thing I can
24 say about Betterment, I'm familiar with them.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 They have great technology, great software. I
2 think it will be a great tool for the folks that
3 join the team. So well done.

4 All right. Do we need a motion to --
5 Okay. So motion to approve the selection of
6 Betterment for Business as our 401K provider.

7 MS. HUBBARD: Second.

8 CHAIRMAN SUMMERS: Moved by Mr. Zarate,
9 second by Miss Hubbard. All in favor?

10 (Chorus of ayes.

11 CHAIRMAN SUMMERS: Any opposed? Great.
12 Okay. Now, the fun begins.

13 MS. DARLING: Yes. Now we get to work.

14 CHAIRMAN SUMMERS: Strategic planning. Go
15 for it.

16 MS. DARLING: So as all of you on the board
17 are aware, except for Alderman Scott who joined
18 us yesterday; we have been in the midst since I
19 started in a strategic planning process in an
20 effort to work on the Chicago Infrastructure
21 Trust 2.0 at the request of the Mayor and do a
22 reboot of the Infrastructure Trust.

23 And in an effort to do that we have
24 been working closely with the CCA, the Civic

Chicago Infrastructure Trust Meeting - January 27, 2016

1 Consulting Alliance, and we have been working
2 with Antonio Benecchi who joins us here, raise
3 your hand, Antonio. And through Antonio and
4 Brian Fabes at the CCA, we were lucky enough to
5 have Tom Budescu be assigned to us as our CCA
6 fellow. He is secunded to us for three months
7 which has been wonderful. So Tom has been coming
8 to work with us at the CIT every day since
9 December and he has been engaged in a very
10 serious strategic framework discussion with you
11 on the board, other stakeholders and helping us
12 plan for the future.

13 And so I am going to turn it over to
14 Tom to give an update on his work so far. And I
15 really want to express my appreciation to both
16 him personally and to the CCA for the terrific
17 support that they have given the CIT as we -- as
18 we find a really successful path forward. And
19 based on Tom's work so far, I am very excited
20 about the path we see ahead of us. I'll turn it
21 over to you.

22 MR. BUDESCU: Thanks, Leslie. So as Leslie
23 gave a good overview of the scope, you know, I
24 think the CCA's working with the CIT to help

Chicago Infrastructure Trust Meeting - January 27, 2016

1 define and clarify the strategic and operational
2 framework with an eye towards effectively
3 delivering needed infrastructure projects and
4 over time an aim to become self-sustaining.

5 You know, the critical elements of
6 what this entails in terms of our analysis is
7 defining what the appropriate scope of CIT
8 activities are, thinking through the project
9 evaluation framework and also figuring out an
10 operating model that complements the strategic
11 goals of the CIT.

12 As Leslie mentioned it's been a --
13 I've been seceded for three months and that's
14 set the project schedule starting around mid
15 December and we are probably going to keep going
16 through mid March.

17 A quick update on where we are and
18 what's still left to do. We identified a list of
19 key stakeholders and also formed a Project
20 Steering Committee. To date we've interviewed
21 all the identified key stakeholders and that's
22 amounted to over a dozen interviews and begun to
23 synthesize the stakeholder feedback regarding --
24 as well as internal CIT guidance regarding the

Chicago Infrastructure Trust Meeting - January 27, 2016

1 updated organizational mission and goals.

2 And we are in the process of having
3 the first Steering Committee to review and
4 finalize that high-level organizational mission
5 and goal.

6 CHAIRMAN SUMMERS: Tom, can you just remind
7 everyone who is on the Steering Committee?

8 MR. BUDESCU: Yes, absolutely. So the Board
9 Chairman, Kurt Summers, is on the Steering
10 Committee along with the City's CFO, Carol Brown.
11 The Deputy Mayor, Steve Koch. Commissioner,
12 Rebekah Scheinfeld from the Department of
13 Transportation and David Narefsky who is on the
14 Board of the Civic Consulting Alliance and also
15 sort of a nationally known expert in the
16 infrastructure finance community.

17 And, you know, once that portion -- we
18 are progressing on that portion and then moving
19 forward after the finalization of the updated
20 organizational mission and goals, we are going to
21 look to better define the more grand strategic
22 and operational decisions which, you know,
23 includes defining the project screening and
24 operational strategies. And then finally

Chicago Infrastructure Trust Meeting - January 27, 2016

1 refining and finalizing a comprehensive report
2 that captures the mission as well as the
3 strategic and operational framework in
4 articulating the value proposition for the
5 Infrastructure Trust.

6 And so I did want to walk you guys
7 through some of our initial findings based off of
8 the key stakeholder interviews. And, you know,
9 as I noted these remain drafts that will continue
10 to be refined with feedback from the Steering
11 Committee as well as the key stakeholders.
12 Leslie, would you --

13 MS. DARLING: Oh, I'm sorry, yes.

14 MR. BUDESCU: So the first focus we've had
15 is refining the mission and guiding principle
16 based on key stakeholder interviews. We've found
17 that there's been a fair amount of consensus
18 regarding what the CIT mission and guiding
19 principles should be. And we have sort of tried
20 to take an initial draft in laying them out with
21 saying the CIT shall seek to leverage alternative
22 financing and delivery structured to expand the
23 capacity of the City and other government
24 agencies to deliver new and improve existing

Chicago Infrastructure Trust Meeting - January 27, 2016

1 infrastructure.

2 And building into that the principles
3 that will guide the CIT will include, you know,
4 looking to provide services that are
5 complementary to the City and that responds to
6 the needs of the City and its sister agencies.
7 Insuring value to the City and its sister
8 agencies and through that the City taxpayers and
9 the delivery of infrastructure projects. And
10 looking to act as a dedicated specialized
11 resource for alternative project delivery to the
12 City and its sister agencies.

13 And then on the next slide, you know,
14 we've talked to a lot of the stakeholders about
15 how do we refine the intermediary and long-term
16 goals and the vision for what the CIT wants to
17 achieve. And, you know, I think we've had a lot
18 of conversation about really establishing
19 intermediary goals and achieving them and
20 building the framework for the success of the
21 ambitious vision of the CIT.

22 I won't go into too much detail
23 knowing we've only got a limited amount of time;
24 but, you know, on the organizational structure we

Chicago Infrastructure Trust Meeting - January 27, 2016

1 want to sort of continue building and expanding
2 on the personnel and institutional resources. On
3 operational funding, you know, we want to
4 introduce external revenue streams that fit the
5 structure and strategy of the CIT. And over time
6 increase the proportion of the operational
7 funding that's being funded from these external
8 revenue sources.

9 We want to expand our base of
10 knowledge to grow to become a nationally
11 recognized subject matter expert, and one that
12 can be a great resource to the City and the
13 sister agencies. And I think on the project side
14 we want to really focus on project execution
15 initially and getting things right and taking
16 successes to market. And over time build on that
17 and be even more ambitious as we start to build a
18 base of project success. That's all I have.

19 MS. DARLING: Any questions for Tom or me on
20 the project?

21 CHAIRMAN SUMMERS: Tom, have you been able
22 to visit with all the advisory board members as
23 well?

24 MR. BUDESCU: Well, I have been not with

Chicago Infrastructure Trust Meeting - January 27, 2016

1 Alderman Scott, but I'm sure we can work on --

2 CHAIRMAN SUMMERS: You've had a whole 24
3 hours.

4 MR. BUDESCU: Yes.

5 CHAIRMAN SUMMERS: But the others you have?

6 MR. BUDESCU: I have.

7 CHAIRMAN SUMMERS: Great.

8 MR. LINGENFELTER: I just wanted to note,
9 Tom, we glossed over this. Tom is donated by EY
10 to CCA for this period of time. So that's an
11 example of the private sector investing in the
12 City's infrastructure right from the start.

13 CHAIRMAN SUMMERS: Great. Sounds like, you
14 know, from your conversations with the board
15 members, advisory board members, we agree that
16 there's sort of a violent agreement on what we
17 need to be focussed on in the shortened
18 intermediate term which is great.

19 MR. BUDESCU: Absolutely.

20 CHAIRMAN SUMMERS: All right. Well, we look
21 forward to getting the update at the end of your
22 work.

23 MR. BUDESCU: Yes.

24 CHAIRMAN SUMMERS: Now, we are going to move

Chicago Infrastructure Trust Meeting - January 27, 2016

1 to individual project updates. And I think
2 Leslie is going to pull different folks for
3 different parts of it. So I will let you focus
4 with that.

5 MS. DARLING: We actually have a number of
6 projects to discuss and updates for you today.
7 The first one we are going to start with is an
8 update on Retrofit One. I know you are aware
9 that that project was instigated between the CIT
10 and the City, in particular the Department of
11 Fleet and Facilities Management, in 2013.
12 George, is that right?

13 MR. MARQUISOS: It kicked off April 15th of
14 2014.

15 MS. DARLING: 2014. So we are well into
16 that project, but we thought it would be
17 important today to actually have George, who was
18 running for the project for the PBC and now for
19 the CIT give you an update and sort of have an
20 opportunity to educate you on -- a little bit
21 more on how that project worked, what our
22 learnings were from that project and then how we
23 can actually build upon that for some of our
24 future plans.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 Another thing I'm going to update you
2 on is the CTA's 4G project which has recently
3 been completed. We are also going to talk
4 extensively about an update on our smart street
5 lighting project which I am really excited to
6 share our progress with you. And then we are
7 going to be joined by our friends at George K.
8 Baum Investment Bankers who are sitting behind
9 Alderman O'Shea, Alderman Scott and Chairman
10 Summers and the City CFO, Carol Brown, who are
11 going to address the home buyer assistance
12 program that the Mayor announced earlier this
13 week.

14 So I want to go ahead and turn it over
15 to George to give us the update on the Retrofit
16 One Project.

17 MR. MARQUISOS: So when Leslie asked me to
18 put together a few slides, I went back to the
19 deck that we used when we kicked off this
20 project. And it's all often sobering for a
21 project manager to go back and look at what they
22 promised versus what we deliver.

23 So this is essentially the slide that
24 we promised. The project description was there

Chicago Infrastructure Trust Meeting - January 27, 2016

1 was this desire to see if we could somehow
2 leverage the energy spend that the City has and
3 allocate some of that money towards modernization
4 and those kind of energy related capital
5 improvements would pay for themselves over a
6 period of time.

7 And so the goal was can we do this in
8 a wide variety of public buildings across the
9 City. We want to utilize these special companies
10 called ESCO's, that's Energy Service Companies.
11 These are national companies who do this for the
12 federal government and for universities and a lot
13 of other companies, corporations.

14 They do kind of a special job. They
15 get contracts under this thing called a
16 performance contract. So you bring them in and
17 they will analyze how you are using your
18 buildings and they'll make recommendations on how
19 you can use them better. And if you hire them to
20 make those improvements, they'll design, install
21 and they will guarantee the performance of
22 everything that they install.

23 So what that means is in our case they
24 came back and said, we think you can save a

Chicago Infrastructure Trust Meeting - January 27, 2016

1 million-and-a-half dollars a year. And if we
2 don't, they write a check for the difference.
3 And then they also have to continue to make
4 improvements until we do achieve that
5 million-and-a-half or 1.4 million per year. So
6 that was the -- those are the deal points. That
7 is what we asked for. And this was the first
8 project that the CIT took on right after their
9 kind of -- so this is the inaugural project. So
10 let's see how we did and what we learned.

11 So there was a lot of back and forth
12 in the planning stage. We had a lot of
13 recommendations. The ESCO's looked at -- started
14 out with 235 possible buildings. We landed at 60
15 as candidates for the first round Retrofit One.
16 We came up with 114 discrete energy conservation
17 measures, these are the ECM's is what the term is
18 in the energy world about projects that you can
19 use -- you can do to save energy. We ended up
20 with about an 18 percent annual reduction in the
21 buildings that we touched and a guaranteed
22 savings of just over 1.4 million. And we did all
23 this for 12-and-a-half million dollars.

24 And the primary objectives -- there

Chicago Infrastructure Trust Meeting - January 27, 2016

1 were -- the Mayor announced this as a win, win,
2 win, win proposition. So it was an opportunity
3 to create local jobs and have minority
4 participation and we were going to further our
5 sustainability goals by reducing greenhouse
6 gases. And in addition to that, we were going to
7 kind of enhance the City's efforts to control and
8 manage their buildings better ideally from remote
9 locations through computers. And along the way
10 hopefully we would improve occupant comfort. So
11 that was the grand promise.

12 And here is where we landed. Under
13 creating local jobs, over 180 people worked on
14 this project over a year-and-a-half. 50.5
15 percent of the trades people were Chicago
16 residents. We don't have the final numbers yet
17 on the MBEW participation, but we came in at just
18 under 25 percent MBE, 23.55; and just over 5 for
19 WBE. We exceeded the community involvement
20 numbers, but that's a little bit -- we define
21 community as quite broadly so I'm not sure that
22 was a really relevant stat.

23 We did achieve the greenhouse gas
24 savings equivalent to taking just under 3,000

Chicago Infrastructure Trust Meeting - January 27, 2016

1 cars off the street every year. So that's a good
2 thing. And I think the big legacy of the
3 Retrofit One project is that the City now has 35
4 more buildings that they can -- with new controls
5 that they can look at and remotely monitor from a
6 computer workstation as opposed to sending
7 someone out there and actually driving to the
8 building.

9 And so that's been a culture change
10 for 2FM and I am pleased and proud to be part of
11 it. And I'm really happy to see how it's been
12 adapted and adopted by the City's operating
13 engineers. So I'm proud to say that right now I
14 would say a good 40 percent of the operating
15 engineers the first thing they do when they come
16 in in the morning is log into their computer
17 which is a different mindset than where they were
18 when we started this project.

19 In terms of improving occupant comfort
20 and system functionality, there is a wide range
21 of examples of how comfort improved. I have a
22 lot of branch managers at libraries telling me ir
23 spaces are better and the temperatures are more
24 even and they love the way the system operates.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 We had some kind of sizeable
2 differences at Harold Washington Library and at
3 Woodson Regional Library where we did major
4 lighting changes and people have really commented
5 on just how dramatic the libraries feel as a
6 result of this lighting switch. We can go on --
7 there's a lot of examples of that, but I won't
8 bore you with all of them.

9 So in addition to kind of achieving
10 our stated goals, there are a lot of additional
11 benefits or ancillary benefits that go along with
12 these kind of projects. And I think they're
13 worth noting. And more than that I think it's
14 sometimes worth doing these projects to get to
15 the ancillary benefits so we're monetizing the
16 energy savings, but in some regards the energy is
17 second to the overall project.

18 And so the things that came out of
19 Retrofit One is we had fairly extensive training
20 of operating engineers on the latest computer
21 systems, so building automation systems. The
22 City has a platform called GBMS, it's a Global
23 Building Monitoring System that they spent a fair
24 amount of money kind of putting in the works; but

Chicago Infrastructure Trust Meeting - January 27, 2016

1 no one really used it because they didn't really
2 know how. So we now have people logging into
3 GBMS both in the ESCO world and the City's world
4 and they are able to look at buildings across the
5 City and track transit how they're performing and
6 see what the temperatures are. And it's really
7 turning into something quite vibrant.

8 MR. SCOTT: So are all the engineers -- all
9 of them trained or do you have a number of
10 engineers that have been trained with --

11 MR. MARQUISOS: We trained the engineers who
12 had responsibility for the 60 buildings. The
13 City manages and operates over 480 buildings.
14 This is a small subset. But we also trained
15 their superiors so each -- the City is divided
16 into four operating zones. Each zone has a chief
17 and two assistant chiefs. All those people have
18 been trained.

19 MR. SCOTT: Okay.

20 MR. MARQUISOS: And this is an ongoing
21 training. So every month we meet at the chiefs'
22 and assistant chiefs' meeting and we bring a
23 building automation system lesson learned. And
24 we walk them through it and demonstrate how that

Chicago Infrastructure Trust Meeting - January 27, 2016

1 -- and these are not -- these building automation
2 systems take a long time to get right. Each
3 building is different. They operate kind of
4 uniquely. And there's definitely been some fits
5 and starts; but once the building gets going and
6 operates and shuts down when no one is in it,
7 it's a good thing. It actually does work.

8 The other part of it is as part of
9 this system we procured a computerized
10 maintenance management system, CMMS. That is
11 basically a work order system. The City already
12 has a work order system, but it is a work order
13 system that's utilized to track people's
14 complaints about a building. This work order
15 system is for preventive maintenance.

16 So the deal with the ESCO's was they
17 guarantee the savings, but you also have to tell
18 us what to do to maintain things so we have that
19 savings over time. So they tell us what to do
20 through this CMMS system. So we have this up and
21 running and we've trained the operating engineers
22 and they receive automated e-mails, it's time to
23 check the fan belt. It's time to change a
24 filter. It's time to lubricate this motor,

Chicago Infrastructure Trust Meeting - January 27, 2016

1 whatever it is. And then they in time have to
2 respond through this system letting the ESCO's
3 know that the preventive maintenance has in fact
4 been done.

5 The other big part of this project is
6 we now have third-party people looking at how
7 these buildings are operating. These ESCO's are
8 on the hook for the savings for the next 14
9 years, so they have whole divisions that pull
10 data from these building automation systems and
11 they're tracking to see how they're operating so
12 these savings are being achieved. And when
13 they're not being achieved, they give us a heads
14 up. So we get e-mails now all the time that say,
15 by the way, you had this on manual override. It
16 was on all weekend. Is there a reason for that?
17 And so that's the kind of outside input that kind
18 of helps people stay on track.

19 Prior to this project there was a real
20 siloed effect between those who operated the
21 building and those who paid the bills for the
22 building. The operators never really understood
23 how much energy they were using. Now with
24 Retrofit One they know that there's cost

Chicago Infrastructure Trust Meeting - January 27, 2016

1 consequences associated with how they run the
2 building. And so there's a lot greater awareness
3 of how utility dollars are being spent.

4 The good news from the ESCO world is
5 that they did achieve their substantial
6 completion. There were no change orders for the
7 base contract sum. We actually wrote a few
8 change orders. The City requested that the
9 ESCO's do some additional work while they were
10 there. And so generally speaking it was a
11 success in that regard. And that's one of the
12 benefits of the performance contract is, you're
13 not buying a particular scope of work, you're not
14 buying a chiller; you're buying the performance
15 of that chiller. So whatever it takes to get
16 that chiller performed, they have to do. And so,
17 therefore, you get rid of all the change order
18 stuff and their little incidental adds. Any
19 questions at this point?

20 MS. DARLING: I really want to credit George
21 because he drove that project at the PBC and was
22 project managing it himself. And so all of the
23 results that you are seeing should really -- he
24 won't like me for this, but really should be

Chicago Infrastructure Trust Meeting - January 27, 2016

1 accredited to him and one of the big reasons that
2 I really wanted to see him join us at the
3 Infrastructure Trust. So this is really his work
4 and his project.

5 MR. MARQUISOS: I appreciate that, but it's
6 not true. There's a lot of people who worked on
7 this and it's a tough slug. I don't want to say
8 that everybody should do this, it's really easy.
9 It's very detailed and you're saving pennies all
10 over town and it accumulates. But I think it's a
11 general -- it's a way to kind of start the
12 conversation about how do we optimize the way
13 that our buildings are managed and operated.

14 MR. O'SHEA: George, what about a scenario
15 where we're not achieving what we're being told
16 to do. Who is held accountable for that?

17 MR. MARQUISOS: That's a very good question.
18 So we are in the -- we finished the installation
19 period. We are now in the performance period.
20 And so what ends up happening and I'm probably
21 going to get kicked under the table here because
22 this is off topic; but what ends of happening now
23 the ESCO's have a responsibility to produce an
24 annual savings report. And so they -- they are

Chicago Infrastructure Trust Meeting - January 27, 2016

1 going to come back with the list of buildings
2 that they touched and they said, okay, here's
3 what we show you saved. And they have to
4 document it through some previously agreed upon
5 protocols. And if they come up short, they write
6 a check and they have to do additional work on
7 their dime.

8 If they exceed -- if the savings --
9 and just to be truthful, the ESCO's typically
10 build in a safety factor so if they think you're
11 going to save 20 percent, they will guarantee you
12 18 percent. And they have a fluff factor in
13 there. So generally they hit their numbers, but
14 there are exceptions.

15 And if we have disputes, there's
16 contractual provisions where we bring in a
17 third-party expert to arbitrate those disputes.
18 But we did a lot of research in the procurement
19 of these ESCO's. It's a pretty rare occurrence
20 that they don't hit their numbers and they don't
21 live up to their -- they do occasionally write
22 checks and they really don't fight that.

23 MR. O'SHEA: So in this first year of
24 operating like this, we are in roughly 15 percent

Chicago Infrastructure Trust Meeting - January 27, 2016

1 of our City owned buildings, 60 buildings of the
2 400 some odd?

3 MR. MARQUISOS: Right.

4 MR. O'SHEA: Have there been any examples of
5 those 60 where they haven't come close to hitting
6 where they thought they were, whether that be
7 those buildings were already operating
8 successfully?

9 MR. MARQUISOS: No, what we encountered was
10 we had buildings that had unforeseen
11 circumstances that limited the ESCO's capacity to
12 do certain things. I don't want to get in too
13 much detail, but public safety headquarters is a
14 perfect example at 35th and Michigan. We had a
15 very large lighting control project scheduled
16 there because that building is largely unoccupied
17 a large part of the day and we wanted to shut off
18 all the lights.

19 A real reasonable plan the ESCO's went
20 in there like they're supposed to, they put their
21 data loggers in. They said these lights are on
22 24/7. There is nobody here. We can shut them
23 off.

24 But when we went to install the

Chicago Infrastructure Trust Meeting - January 27, 2016

1 sensors we realized that that building is set up
2 with a -- it's a critical infrastructure building
3 and it's backed up by generators. Not just to
4 give enough energy to get people out of the
5 building, but to keep that building running. And
6 so one-third of its circuits are on this
7 emergency system and there was a real desire not
8 to touch those circuits in any way. So one-third
9 of the lights we couldn't sensor. So that left a
10 shortfall.

11 The ESCO's found other opportunities
12 within that building to save energy. And so we
13 ended up coming actually a little bit higher than
14 we envisioned, but it wasn't through turning off
15 the lights. There were some other measures that
16 were -- so it's that kind of switching around
17 when we find things that didn't quite work as we
18 had thought.

19 MR. O'SHEA: Thank you.

20 CHAIRMAN SUMMERS: In terms of the way the
21 ESCO's work, obviously they hold the liability
22 for not performing. If there is substantial
23 out-performance, is there some ability to
24 participate or if exceeds what was required to

Chicago Infrastructure Trust Meeting - January 27, 2016

1 finance the initial project?

2 MR. MARQUISOS: Yes, that's the -- the terms
3 of the deal are and I think Bank of America
4 really was hoping that this was going to happen
5 is if there is excess saving as we think there
6 will be, the debt gets paid back quicker. And
7 then as soon as the debt gets paid back, the City
8 realizes all the savings for themselves. So
9 that's the way it's supposed to work.

10 CHAIRMAN SUMMERS: Great.

11 MR. MARQUISOS: To be determined still.

12 MS. BARRETT: Quick question, back on your
13 win, win, win slide you cited the 18 percent.
14 Have you tracked the aggregate where we are
15 against that target now?

16 MR. MARQUISOS: That will be the first
17 savings report that we expect to see end of
18 February.

19 MS. BARRETT: Okay.

20 MR. MARQUISOS: So they have to collect the
21 utility bills through the end of the year and
22 then they analyze it and give us their first
23 draft report.

24 MS. BARRETT: That may be a good opportunity

Chicago Infrastructure Trust Meeting - January 27, 2016

1 for the trust to remind people about what those
2 goals were and how performance is.

3 MS. DARLING: Absolutely. And we'll be
4 bringing a much shorter Retrofit One update at
5 our future board meetings so we will make sure
6 that we are keeping you all up to date on the
7 progress. We wanted to give a larger
8 presentation today just to make sure that you are
9 all familiar with how the program worked and
10 where is it going in the future. And also
11 because we think it's so important because we
12 think that there are additional opportunities
13 with the City and sister agencies on projects
14 like this that can be realized, a Retrofit Two if
15 you will. And we'll talk about that a little
16 later today.

17 CHAIRMAN SUMMERS: Great. No other
18 questions for George? Then we'll move to the
19 next project.

20 MS. DARLING: Yes. So we're going to talk
21 about the Chicago Smart Lighting Project which
22 since my very first day at the CIT we have been
23 engaged in a comprehensive street light
24 modernization initiative. Where we have -- we

Chicago Infrastructure Trust Meeting - January 27, 2016

1 were asked by the City -- we're working with both
2 the City and the park district and to find out
3 what's possible for the City for an LED
4 conversion for our street lights.

5 So we have many different kinds of
6 street lights in the City and what it would take
7 to change them over to LED which is a much more
8 efficient light. And we were also asked to look
9 at what it would take to install a lighting
10 control network which is a relatively newer
11 technology using nodes on top of street lights.
12 Also, look into the possibility of lighting
13 infrastructure improvements with both our
14 electrical system and our poles. Some of our
15 poles date back to the '50s and so -- which some
16 of them are actually in great condition, but look
17 into what our infrastructure is like and what it
18 would mean to modernize it. And then look at
19 additional services that can be provided by
20 utilizing the street lights. So there is a --
21 there are a number of technologies that are being
22 piloted on this and we wanted to see what might
23 drive revenue to allow us to increase the size of
24 our project.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 So the next slide actually is that
2 hopefully our win, win, win slide for this
3 project. So what our goals for the project are
4 and what we really sought to do in the RFI that
5 was released back in September is our goals are
6 improving public safety, reducing the City and
7 the parks energy consumption and operating costs,
8 creating local jobs, advancing the City's
9 sustainability goals, enhancing public goods and
10 services and supporting the City's economic
11 growth. So this is the -- this is kind of the
12 promise slide we will be looking back at to see
13 if we -- if we were able to accomplish these
14 goals.

15 There has been a tremendous amount of
16 work that's been done with the City and our
17 stakeholders. This is an incredibly important
18 project for Mayor Emanuel. He and the City are
19 very supportive. They've asked us to drive that
20 project for the City. And George and I and Tom
21 have been working really diligently on a daily
22 basis to move the project forward. We have made
23 a lot of great progress.

24 I am going to turn it over to George

Chicago Infrastructure Trust Meeting - January 27, 2016

1 to walk through the timeline with you and then --
2 and I'll chime in occasionally as well, so
3 George.

4 MR. MARQUISOS: So when I told my mom I was
5 taking a new job she asked me what are you doing?
6 And I said, well, I'm being hired to figure out
7 how many people it takes to change a light bulb.
8 And she said, well, they're lucky to have you.
9 I'm sure you'll do a great job.

10 MR. O'SHEA: Spoken like a true mother.

11 MR. MARQUISOS: And then she said, while
12 you're at it, could you fix the light that's out
13 in front of Mrs. Contini's house because it's
14 been out for a while. And I said, well, I think,
15 you know, we'll probably be able to do that as
16 part of this.

17 So the truth of the matter is it
18 sounds like a pretty rudimentary thing, right,
19 let's just convert sodium vapor, high pressure
20 sodium lights to LED and let's just go do it,
21 right? But in actuality it is a fairly
22 complicated calculus to figure out the best way
23 to do that. And we have been working very hard
24 with a lot of people's input to figure out what

Chicago Infrastructure Trust Meeting - January 27, 2016

1 are the best options for the City.

2 And so we started out with an RFI. We
3 received 40 responses mid November. And we got a
4 lot of great information from that process. We
5 picked a bunch of people to go back to and kind
6 of drill down on some of the details and get a
7 better understanding of what people are doing,
8 what they've done in the past, what the future
9 holds, where this business is and who is playing
10 in it. We are really trying to get a sense of
11 the landscape if you will.

12 We've had tremendous participation
13 from the City. Everyone's gotten the message
14 that the Mayor wants this done. So we have eight
15 Chicago departments represented on our Steering
16 Committee and they all show up for these meetings
17 and we present and share the questions and we
18 have really in-depth conversations about how this
19 might work.

20 We've recently broken out into working
21 groups to assess finance structures and asset
22 inventory which is kind of a critical component
23 to this whole thing. And then also the whole
24 technology controls piece. We were asked by

Chicago Infrastructure Trust Meeting - January 27, 2016

1 Carol Brown who just recently joined us to come
2 up with some scenarios financially that how this
3 thing may play out. So she had a better sense of
4 just what is the City on board for to -- when
5 they convert their lights. And so we have done
6 that with the help of Tom. And we think we have
7 the ballpark figured out pretty well. We are
8 going to confirm that in the marketplace, but we
9 have a good idea of what this is likely to look
10 like.

11 In addition, we've made a really
12 important alliance with MEEA, which is the
13 Midwest Energy Efficiency Alliance. And that is
14 a division of the Department of Energy who has a
15 major initiative to transform as many municipal
16 lights to solid state lighting LED. And they
17 happen to be located in Chicago even though they
18 are in charge of the entire midwest region. And
19 their mission is to share best practices and kind
20 of promote this kind of thing, and they've been a
21 really great resource and we are thrilled to be
22 partnering with them.

23 And in addition to that we've been
24 talking to the other City's in our country who

Chicago Infrastructure Trust Meeting - January 27, 2016

1 have made these steps. The biggest player to
2 date is Los Angeles. They have changed 160,000
3 LED's. We are likely to double that number. So
4 this project is significantly large relative to
5 the rest of the country. We've been having all
6 kinds of conference calls with people and we're
7 getting -- we're getting close.

8 MR. SCOTT: In LA, how many did you say they
9 did again?

10 MR. MARQUISOS: 160,000.

11 MR. SCOTT: What was the time span on that?

12 MR. MARQUISOS: Seven years.

13 MR. SCOTT: Seven years.

14 MR. MARQUISOS: And they started out slow
15 with dipping their toes in the water and they've
16 -- they're now at 50,000 per year. And they're
17 kind of -- they're pretty much capped out at
18 their easy lights and now they're working on
19 their ornamental lights.

20 MR. SCOTT: And over the seven-year period
21 because have they had to go back? So you started
22 seven years ago, have they had to go back and
23 before they started the new phase of completing
24 the ornamentals; go back and do any retrofitting?

Chicago Infrastructure Trust Meeting - January 27, 2016

1 Because I'm sure technology has advanced over
2 seven years, have to go back and catch up from
3 seven years ago?

4 MR. MARQUISOS: I asked that same question.
5 And the answer is they have had really good
6 durability success. So the technology has
7 advanced a lot. So when they first started this
8 project a typical Cobra Head LED fixture was
9 \$750. They are buying that fixture today that's
10 even more efficient -- significantly more
11 efficient than that older fixture for under \$200.
12 So it's a -- there's been a tremendous
13 advancement.

14 Because of the early stage of the
15 technology, they decided not to install controls
16 in their early projects. So they are going back
17 now and putting the control nodules on, but other
18 than that they are reporting good success rate as
19 far as durability. They haven't had big issues
20 with outages or replacement of worn out things.

21 MR. SCOTT: And one other question. In the
22 -- the presentation, the last presentation; you
23 talked about the controls having preemptive, if
24 you will, detection so that we can kind of do

Chicago Infrastructure Trust Meeting - January 27, 2016

1 preemptive maintenance. Will that be included in
2 this so that, again, we don't have to wait 10
3 years and have to replace 10,000 of them when we
4 begin to retrofit as we go so that we can do
5 preventive maintenance, is that --

6 MR. MARQUISOS: Well, there's a difference
7 between -- Okay. It's a really interesting
8 question. The nodes tell you real time when the
9 light goes on. So right now we are relying on
10 citizens to call 311 and say, hi, my name is Mrs.
11 Contini, my light is out. And we go out there
12 and we actually verify that the light is out
13 before we send a crew and then we go and fix it.
14 Now we are going to have realtime information,
15 lights out, send someone there. We know for sure
16 that it's out.

17 MR. SCOTT: Right.

18 MR. MARQUISOS: And so that will be a huge
19 step up.

20 MR. SCOTT: And savings and man hours and
21 everything. But, you know, one thing that
22 happens especially in my community especially in
23 the park district is, you know, there is a lot of
24 old copper wiring. And they'll go in and they'll

Chicago Infrastructure Trust Meeting - January 27, 2016

1 strip that copper wiring out of there.

2 Will we know when that -- I mean, I
3 know all the lights will go down, but can this
4 system kind of detect what that issue is? So if
5 it's a bigger issue than just replacing the bulb,
6 if it's wiring; will that system be able to kind
7 of tell us what we need to do to fix it? So when
8 the people come out, they don't come out and say,
9 light's out, we changed the light, oh, something
10 else is wrong. So they have to leave, get the
11 equipment and come back.

12 MR. MARQUISOS: Yes, that's a great
13 question. We are -- so one of the duties of the
14 Midwest Energy Efficiency Alliance, they have a
15 guy who is the national expert on controls. And
16 his name is Michael Poplowski and he'll be
17 joining us in early February. So far we have met
18 him over the phone.

19 But right now the technology exists
20 where it not only tells you whether the light is
21 functioning or not and whether you can dim the
22 lights remotely, you can do all kinds of things;
23 but it also is telling you the realtime energy
24 burn. So you can meter exactly what the

Chicago Infrastructure Trust Meeting - January 27, 2016

1 individual bulb is burning. So the minute you
2 know that continuity is stopped to that circuit,
3 you know that someone is doing something with the
4 wiring. And you can kind of instantaneously know
5 that -- so, yes, other municipalities are using
6 this technology to go after copper thieves.

7 MR. SCOTT: Okay.

8 MR. MARQUISOS: Okay. So we've spent the
9 better part of three months now trying to figure
10 out or requesting information from all kinds of
11 sources. So what have we -- what do we know
12 today that we didn't know when we started this in
13 September? I think a lot. I know personally
14 I've learned a lot.

15 But in general I think that there is a
16 lot of different ways you can structure these
17 deals. They tend to revolve around the
18 transferring of risk and just how you define the
19 risk and who takes it is kind of intricately
20 involved in the deal structure. Everybody
21 recommends that you have a really solid audit of
22 your lights, like what condition they are, how
23 many they are.

24 And CDOT right now has really good

Chicago Infrastructure Trust Meeting - January 27, 2016

1 information on a couple of things, not so good
2 information about the quality of the
3 infrastructure. So we are putting together
4 recommendations on how we can augment the
5 information we have and aggregate it and make it
6 more usable. So we are kind of moving it to a
7 Google map and it will be very useful to see
8 every street light on a map. And we'll be able
9 to kind of give you a characteristics of each
10 light.

11 CHAIRMAN SUMMERS: Real quick, George.
12 Wasn't there also an issue of, you know, the
13 total utility costs and energy use as part of the
14 inventory assignment, the need of, you know, kind
15 of what we have; but how much it's truly costing
16 us in line with our view of that and utility?

17 MR. MARQUISOS: Yes, so that's -- when I
18 first got involved in this people said I wouldn't
19 even touch that because we are getting a great
20 deal from ComEd. The minute you start counting
21 the lights, you're going to end up paying more.
22 And I thought, you know, that's a really
23 interesting marketing ploy. You just let your
24 customer believe that you're paying less than

Chicago Infrastructure Trust Meeting - January 27, 2016

1 you're supposed to and they'll never question
2 their rate.

3 And the reality is that the City pays
4 today somewhere about -- last in 2015 just under
5 \$19 million a year for the electricity to power
6 streetlights. And we pay a very low rate.
7 Probably one of the lowest rates in the country.
8 We are right around 5 cents a kilowatt hour. So
9 what that means is to run a 100 watt bulb for one
10 hour, it costs the City 5 cents. In California
11 it's 12-and-a-half cents. In Hawaii it's 30
12 cents. So it's -- we are paying a very low rate
13 which makes this project difficult to pencil out
14 on an energy only project, but we'll get to that.

15 Anyway, I'm getting a little off
16 track. So the other part that we learned about
17 is pretty much every municipality we talked to
18 when they installed LED's the perception of the
19 population was this is a superior light. The
20 color rendering index is better so you can
21 distinguish between a blue and a green and a car
22 that was -- and so the light is better directed.

23 It doesn't pollute if you will. It's
24 not as -- so generally speaking very well

Chicago Infrastructure Trust Meeting - January 27, 2016

1 received by the citizens and there's a clammer
2 for them in their neighborhoods sooner rather
3 than later. That's kind of been the case in
4 several different places.

5 The other thing we learned is that
6 lots of municipalities have tried different
7 phasing approaches. Most have tried trials,
8 pilot programs. Let's see how it works. And
9 there's some strong benefits to doing that and
10 then there's some cons because you don't get it
11 all done and it just lingers forever. So we're
12 working through that.

13 When we started this we thought that
14 having 200,000 nodes on a wireless network might
15 be incredibly valuable for the City, and could we
16 leverage that value and pay for some of this or
17 -- and what we think what we have determined from
18 the informational interviews that we have
19 conducted so far is the value is still very much
20 in the potential category. There is a lot of
21 possibilities in the future. No one that we know
22 of in the U.S. at least is monetizing that value
23 to date.

24 Having said that, there are cities

Chicago Infrastructure Trust Meeting - January 27, 2016

1 that are using these nodes to collect information
2 from smart meters. So we think there is a
3 potential very good fit with the water department
4 on this project. Again, we are going to work
5 that -- we still have some more to do.

6 And we're -- we feel pretty confident
7 that it makes sense for us to kind of do as much
8 as we can right now; but make sure that we are
9 set up so we are ready for the future. So as
10 this technology emerges, evolves, we'll be able
11 to kind of adapt to it. That's the plan anyway.
12 Anything I forgot?

13 MS. DARLING: No, I think we have some --

14 CHAIRMAN SUMMERS: Just to be clear then,
15 the premise that we are working under is that we
16 want to try to make sure that we have the highest
17 amount of flexibility and adaptability for each
18 node, right?

19 MR. MARQUISOS: Yes.

20 CHAIRMAN SUMMERS: So that if we see
21 opportunities to move from potential to realize
22 or realizable, we can activate that?

23 MR. MARQUISOS: Yes, and actually the
24 industry is going that way. So there is this --

Chicago Infrastructure Trust Meeting - January 27, 2016

1 without getting too detailed, each one of these
2 control nodules come with a receptor that can
3 take three, five or seven pins. The more pins,
4 the more new technologies you can add to it. And
5 so it costs extra to have a seven pin receptor.
6 Everyone is moving to seven pin because they all
7 know that sooner or later you are going to use
8 those pins.

9 Then there's dimmable drivers. We may
10 not dim our lights at this time, but we may want
11 that ability in the future. So it's a marginal
12 cost increase to have a dimmable driver. So
13 those are the kind of things that we'll most
14 likely be doing and specking to make sure that we
15 have the full capability of moving into the
16 future.

17 CHAIRMAN SUMMERS: These are all the fun
18 variables in Tom's model.

19 MR. MARQUISOS: Yes.

20 MS. DARLING: It is. And, yes, we know more
21 about controller modules for LED street lighting
22 than I ever thought I would know, but it's
23 actually incredibly important because of the
24 capabilities of, you know, as George mentioned

Chicago Infrastructure Trust Meeting - January 27, 2016

1 either dimming the lights or, you know, there are
2 certain companies that say if you call 911, they
3 can flash the light in front of your house.
4 There's all kinds of additions that are possible
5 just by using the control nodule.

6 And so we've learned about a
7 tremendous number of options. And what we also
8 learned from Los Angeles is they didn't put the
9 control nodes on when they started and they are
10 going back and putting them on now.

11 MR. O'SHEA: As technology develops.

12 MS. DARLING: As technology develops.
13 Because seven years ago when they started the
14 program, they probably didn't see a use for them,
15 but now they do. We would like to avoid having
16 that additional expense of going back later and
17 putting them on. So we are trying to find a way
18 financially to include them in what we are doing
19 now and we think it's really important for us to
20 maximize the possibilities, to have as many nodes
21 as possible including for the data management.

22 So it's actually an incredibly
23 exciting project. And it may sound a little bit
24 dull, but the good part about this is it

Chicago Infrastructure Trust Meeting - January 27, 2016

1 literally touches every single part of this City
2 and will involve every neighborhood. And it is
3 at its core the kind of project that the CIT
4 should and could be doing.

5 And so we are thrilled about the
6 possibilities and we will, you know, now we are
7 going to look at what the procurement
8 possibilities are. We'll be meeting with our
9 Steering Committee and internally with the City
10 in the next few weeks. And we'll be having a
11 further update for you at our next board meeting,
12 but I expect that you'll be seeing a lot more
13 information about this from all of us here at --
14 on this side of the table coming up in the next
15 few weeks and months.

16 MS. HUBBARD: Did all the RFI respondents
17 have similar capabilities or are some not as
18 advanced as others?

19 MS. DARLING: Some are not as advanced.
20 Because of the openendedness of the RFI, you
21 could respond to some or all of it. And so some
22 companies only did, you know; said, well, we just
23 make the lighting -- we just make the actual lamp
24 head. And so they just told us about their lamp

Chicago Infrastructure Trust Meeting - January 27, 2016

1 head. Some were more wholistic and brought
2 together, you know, their financing and control
3 system and newer technologies, but some just
4 answered part of it. So there was a really wide
5 range including some that were just finance based
6 and then some that were just hardware based or
7 software based.

8 CHAIRMAN SUMMERS: Damon, did you have a
9 question?

10 MR. SILVERS: I was just going to comment
11 that this -- it seems as though you all are
12 grappling with this sort of opportunity or
13 challenge here that on the one hand when you do
14 the -- the replacement with LED lights is a very
15 significant sort of technological improvement and
16 offers the opportunity to deal with things like
17 people having stripped the wires and communities
18 that don't actually have lighting. But the --
19 and the economics of doing that are relatively
20 well established, so it's financeable. But that
21 the next -- the next stage we're a little ahead
22 of the curve.

23 On the other hand, we go to the -- if
24 we go to the expense of sending out the

Chicago Infrastructure Trust Meeting - January 27, 2016

1 electricians to every one of these lights, you
2 won't get that chance again, right. And the
3 history -- and I'm familiar with this in the
4 context of buildings, that it can be very -- you
5 can regret a lot. In the context of doing
6 building renovations, for example, not having
7 done the energy efficient piece of it and them
8 coming back five years later and saying, hey, you
9 know, let's open up the walls.

10 And so the -- I'm very pleased to
11 hear, Leslie, you're talking about really kind of
12 looking under every rock for the revenue sources
13 that will enable you to do the most advanced node
14 that you can. The City will probably deeply
15 regret not doing that, right, if that -- you
16 know, if we're not able to. And it's worth
17 really pushing on that point. It connects to the
18 larger mission of the Trust.

19 If this can be a truly transformative
20 exercise, it will realize kind of what I think
21 the Mayor and the City Council have been looking
22 for from the Trust, something that it's more than
23 incremental. And that he -- managing
24 successfully that kind of -- the fact that we're

Chicago Infrastructure Trust Meeting - January 27, 2016

1 a little ahead of the curve, is going to be key
2 to that.

3 MR. O'SHEA: George, could I get the
4 breakdown; how many street lights, how many alley
5 lights and how many park lights are we talking?
6 The total is --

7 MR. MARQUISOS: We are at 317,000 total for
8 the City. 72,000 of those are alley lights and
9 figure another 20,000 on park pathways. So we're
10 not talking about any stadium lighting. We're
11 not talking about --

12 MR. SCOTT: How many park pathways?

13 MR. MARQUISOS: 20,000, round figures.

14 MS. DARLING: Any other questions on the
15 street lights?

16 CHAIRMAN SUMMERS: Yes, just one other. One
17 of the things that I know came up as we started
18 talking about this is what the response in the
19 departments have been. And maybe you can spend a
20 minute talking about the response, any concerns
21 from the workforce that maintains these today and
22 how we're thinking about that.

23 MS. DARLING: You know, I think I'll start
24 with this. So, first of all, I think that one of

Chicago Infrastructure Trust Meeting - January 27, 2016

1 the valued propositions that the -- the CIT can
2 bring is to be able to work with so many
3 different stakeholders and departments. And work
4 across the agency and cross departmentally and I
5 think that this project has been a great example
6 of, you know, so far how that's been very
7 successful for us.

8 As George mentioned in his
9 presentation, we have had outstanding
10 participation from the commissioner level on down
11 to the men and women who are installing and
12 working on street lights right now.

13 George and I were just out at the
14 Bureau of Electricity last week meeting with the
15 team that does the work out there, and it is a
16 fascinating place where we learned a great deal
17 about the day-to-day operations of the Bureau of
18 Electricity.

19 So we -- we obviously have to look at
20 what kind of options we have as to operational
21 savings and what that would look like; but we
22 haven't made any firm decisions or have any firm
23 recommendations on that except to make a
24 determination, to go to Damon's point, which is

Chicago Infrastructure Trust Meeting - January 27, 2016

1 how can we drive as much savings as we can to be
2 able to achieve the largest project that we can.

3 CHAIRMAN SUMMERS: Sure.

4 MS. DARLING: Because some of our
5 infrastructure needs a great deal of work. Some
6 of the electric needs a great deal of work. You
7 can put an LED fixture on many of the lights, but
8 we want to make sure as the City and the CIT,
9 that when we are putting a lamp head on a pole
10 and the lamp head has a 10-to-15-year lifespan;
11 we want to make sure that that pole is going to
12 survive for 10 to 15 years also. It doesn't make
13 sense to put something up on a pole that won't
14 last.

15 And that also goes directly also to
16 George's point on the assessment of our inventory
17 and how important that is. And that is, you
18 know, the -- we have to determine how we are
19 going to share the risk with the vendors or the
20 workers and the internal City workers who are
21 going to be doing that work and who is doing it.
22 There's a lot of remaining questions so.

23 CHAIRMAN SUMMERS: That's just one thing I
24 think to serve as a reminder to all of us that,

Chicago Infrastructure Trust Meeting - January 27, 2016

1 you know, the savings that are not just, you
2 know, energy efficiency savings, you know,
3 lowering that 19 million; some of those are going
4 to come from owing them savings as we think about
5 this and those aren't just numbers on a piece of
6 paper, right. And so we have to be, as Leslie
7 and the team are, I want to make sure that we all
8 have an understanding of that; we have to be
9 understanding of all the implications of that and
10 the full set of options that we have. Because to
11 your point, there's plenty of work to be done,
12 right.

13 MS. DARLING: Right.

14 CHAIRMAN SUMMERS: And there may be lots of
15 opportunities for -- for taxes to be freed up for
16 that work. And there's plenty to be evaluated to
17 Alderman Scott's point on preventative
18 maintenance and what's required there; but this
19 is, you know, it's all collectively more than
20 just kind of numbers on a spreadsheet, that's
21 all.

22 MR. SCOTT: Last question I think.

23 MR. O'SHEA: Don't say that.

24 MR. SCOTT: So when --

Chicago Infrastructure Trust Meeting - January 27, 2016

1 CHAIRMAN SUMMERS: Didn't he just start
2 yesterday?

3 MR. SCOTT: With other alderman like myself
4 and Alderman O'Shea who have menu money and TIF
5 dollars who are actively right now saying, okay,
6 I have dire improvements that are needed
7 immediately, are we -- when we're looking at the
8 infrastructure not just the pole; are we looking
9 at the infrastructure?

10 Now, I know you are working with these
11 other agencies. The park district has brand new
12 buildings that are coming online, are we looking
13 at them and making sure that they are running the
14 proper infrastructure underneath so that if we do
15 go back and replace those poles in the next few
16 years, that we don't have to throw in more money
17 because it's already been done. Are we looking
18 at that?

19 MR. MARQUISOS: Do you want me answer that
20 one?

21 MS. DARLING: Yes.

22 MR. MARQUISOS: So one of the things that we
23 learned in this process and it was kind of a
24 harsh lesson is the thinking that we were going

Chicago Infrastructure Trust Meeting - January 27, 2016

1 to be able to kind of let's just change
2 everything and make it all new like we did in
3 1950. It's not going to happen. We're talking
4 over \$2 billion to make every pole in this town
5 brand new with the associated underground wiring
6 and everything that goes along with it.

7 So the menu program, the TIF program,
8 is going to continue to be the incremental
9 improvements on a block by block basis. But we
10 do think there is an opportunity for this program
11 to stabilize the existing structures to reach the
12 threshold that Leslie defined.

13 We are looking for things to last 10
14 to 15 years in line with the life of the new
15 light that we are putting on. So that's the
16 current structure. Again, nothing has been
17 decided yet. Our job is to bring recommendations
18 to the City with their options and their pros and
19 cons and get direction from them.

20 MR. SCOTT: Well, I just want to make sure
21 that what I would hate to do as an alderman is to
22 go in and redo my lights, and there is a
23 recommendation on the table that if it's going to
24 cost me a little bit more, I would rather do what

Chicago Infrastructure Trust Meeting - January 27, 2016

1 I need to do to make sure that it's compatible to
2 the rest of the ward. I wouldn't want to put up
3 some lights that maybe they're LED, but they're
4 not the technology that we're talking about, the
5 nodes where we have to improve them. Down the
6 line I'm going to have to put another X amount of
7 dollars to improve what I've already done.

8 So my suggestion would be when we are
9 dealing with our different sister agencies as
10 well as departments if their recommendation comes
11 sooner rather than later; to share that standard
12 with people so that when we go in and I go in and
13 I do Roosevelt or I do Kedzie, I'm doing them in
14 the manner that you would do them so that down
15 the line if I need to upgrade, I can.

16 MS. DARLING: Right, and we are -- we are
17 really cognizant of that. And the aldermanic
18 menu money is something we have discussed and are
19 well aware of and we are taking that absolutely
20 into consideration. We certainly don't want the
21 City Council to have to use their funds for
22 something that we are going to be doing in 6
23 months or 12 months or 18 months. I mean, this
24 is -- no matter what we do, this is a phased

Chicago Infrastructure Trust Meeting - January 27, 2016

1 project and we won't be able to do everything --
2 every single ward at one time. And so it will be
3 phased, but we want to be cognizant and we are
4 well aware of the challenges you face and we want
5 to be helpful to you and in that respect. And so
6 we will definitely be cognizant of that going
7 forward and we'll keep you updated.

8 And so there will be, you know, should
9 we get to an actual project phase, there will be
10 a lot of information shared with you about what
11 that phasing of that project will be so you know
12 when to expect that LED delivery would come to
13 your area.

14 CHAIRMAN SUMMERS: It's an interesting
15 question, you know, whether aldermen through menu
16 money would have the ability to opt into things
17 that we can't afford system wide as we were
18 discussing, right. If we have kind of taken care
19 of, you know, new bulbs and nodes, but there's,
20 you know, additional technology that might be of
21 interest that we pursue if there was revenue or
22 some financial support mechanism that we can't do
23 system wide; it would be interesting to see if
24 there's a way for folks to opt in.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 MS. DARLING: I think that for right now
2 absolutely everything is on the table including
3 certainly perhaps piloting those technologies as
4 they come online. So as we move forward and
5 learn more about that and have recommendations to
6 make, we will be bringing them back to you.

7 MR. MARQUISOS: And just to clarify, the CIT
8 will not be writing any specifications on this
9 project. Everything will be coming out of CDOT
10 and it is the standard City -- whatever CDOT says
11 is the standard that will be throughout the
12 system. So whether it's menu or smart light or
13 whatever it is, everyone is working off the same
14 spec.

15 MR. SCOTT: Okay.

16 CHAIRMAN SUMMERS: Great. Any other
17 questions on lighting?

18 MS. DARLING: All right. I think in the --
19 I am going to skip over 4G for now because I know
20 that Carol Brown is here. She is the Chief
21 Financial Officer of the City of Chicago and we
22 have our guests from George K. Baum here as well
23 and -- I can't actually see Carol. Can I ask you
24 to -- Can I ask you to join us up at the table?

Chicago Infrastructure Trust Meeting - January 27, 2016

1 Hi. Welcome.

2 MS. BROWN: Thank you.

3 MS. DARLING: Since I introduced Carol,
4 Anthony and Al and Mark; could you all introduce
5 yourselves as well to the board, please.

6 MR. BOUMENOT: Al Boumenot, George K. Baum.

7 MR. PASKULIN: Marc Paskulin, George K.
8 Baum.

9 MR. FRATTO: Anthony Fratto, George K. Baum
10 & Company.

11 MS. DARLING: Thank you. So as the board
12 knows and I sent some information out to -- over
13 the past few days, this week Mayor Emanuel
14 announced that the City in conjunction with the
15 CIT are moving to help make homeownership
16 possible for low and moderate income families by
17 providing support for down payment and closing
18 costs.

19 In this program the qualified buyers
20 can receive a grant of up to seven percent of the
21 total loan amount based on their income. We
22 firmly believe that the infrastructure of the
23 City is based on homeownership and strong
24 communities. And so the CIT is thrilled to have

Chicago Infrastructure Trust Meeting - January 27, 2016

1 been asked by the City to assist them in
2 administrating this program.

3 We will do some back office compliance
4 work for the City. We will receive some fees to
5 do that. And we will be hiring at least one
6 person into the CIT to administer that program in
7 conjunction with the City. I asked Carol to join
8 us today and also Al and Marc and Tony from
9 George K. Baum to help share with you some of the
10 details about that program.

11 I know you've received a lot of
12 information and a lot of documents on this
13 already many times over. So I'm happy to discuss
14 the program further, but I thought it might make
15 more sense to open it to questions instead of
16 giving you a full presentation. But I'm happy to
17 do whatever the board would desire.

18 MR. ZARATE: Do we have any lenders in place
19 already or is this brand new hot off the press?

20 MS. DARLING: Well, right now the process
21 has just begun. There will be an ordinance that
22 will be introduced at the City Council in
23 February with the hopes that it will pass at the
24 March City Council. And so all of the details of

Chicago Infrastructure Trust Meeting - January 27, 2016

1 the program are still being worked out including
2 all the documentation that has been sent to you
3 is all in draft form. There is still a lot of
4 finalization that needs to take place.

5 So I believe the thought is to start
6 with a few lenders that are already working with
7 the City. But any lender who wants to
8 participate who qualifies under HUD and FHA and
9 fills out an economic disclosure statement with
10 the City can participate. The CIT will not be
11 analyzing them or selecting or choosing any
12 vendors in any way. That will all be done
13 through the City.

14 CHAIRMAN SUMMERS: And the process before it
15 was a -- it was the designation of MCC or I don't
16 remember what it was, there was some -- you guys
17 had in your presentations.

18 MR. FRATTO: The City has an MCC program
19 that they administered for many years and over
20 the years they had about 20 different lenders
21 that they worked with that they had been
22 successful with in administering their MCC
23 program.

24 So what we did since we've -- we've

Chicago Infrastructure Trust Meeting - January 27, 2016

1 been involved with housing issues for the City
2 since maybe 1995. And one of the things that's
3 important whenever we get involved in any of
4 these things, not only in Chicago but anywhere;
5 is to make sure you have some lenders that can
6 pull their oars, you know. And they are the ones
7 that are going to have to be out there on the
8 ground as well as the aldermen and their
9 respective communities.

10 And it's kind of a process for
11 everybody together to help let folks know about
12 this and let them know how it works. And that's
13 how these loans get paid and that's how people
14 get into homes that they wouldn't necessarily be
15 able to get into.

16 CHAIRMAN SUMMERS: So to Miguel's question,
17 do they just apply to be an MCC and fill out --

18 MR. FRATTO: Not the MCC. They can just
19 apply -- apply to be in the program. They can
20 apply here since they are going to be helping
21 with the administration.

22 MS. BROWN: Well, wait. Just to be clear
23 are you asking how home buyers?

24 CHAIRMAN SUMMERS: No, I'm asking --

Chicago Infrastructure Trust Meeting - January 27, 2016

1 MS. BROWN: Or the lenders?

2 CHAIRMAN SUMMERS: Miguel's question was
3 about lenders.

4 MS. BROWN: Lenders. So as Leslie said we
5 will have a standard lender participation
6 agreement and there are requirements under the
7 federal program. So because this program is
8 designed to assist people in accessing kind of
9 federal loans, the City is not obviously creating
10 the loans. And if the lender is willing to enter
11 into that agreement, if the lender is willing to
12 submit an economic disclosure form and if the
13 lender meets the requirements under the federal
14 programs; those would be the three kinds of
15 screenings that we would do. We would not impose
16 any additional kind of parameters for potential
17 lenders.

18 CHAIRMAN SUMMERS: Awesome.

19 MR. FRATTO: Like we mentioned the MCC, all
20 of those lenders have done all of the things
21 that --

22 CHAIRMAN SUMMERS: That's what Carol has
23 just said.

24 MS. HUBBARD: Can we clarify the role of CIT

Chicago Infrastructure Trust Meeting - January 27, 2016

1 in this? I know we administer the loans once
2 they're in place, but what exactly does that --
3 what will our process be, our responsibilities?

4 MS. BROWN: So the City had a pretty robust
5 and successful single-family low income down
6 payment assistance program that started like kind
7 of in the -- I don't even know if it started in
8 the '90s, but as Tony alluded to it was '90
9 through kind of the housing bubble. And at the
10 time the City also had a separate housing
11 department.

12 When Mayor Emanuel took office in
13 2011, he kind of reorganized City Hall and
14 wanted to save money and get efficiencies. And
15 one of the things he did was collapse the housing
16 department into the Department of Planning and
17 Development.

18 And I should step back and say in 2008
19 when the market crashed, the housing bubble --
20 the single family -- this program really kind of
21 died out and we weren't really writing new loans
22 and we weren't really bonding. Because under the
23 original program we actually issued debt to
24 support the program.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 So George K. Baum approached us almost
2 two years ago to consider revamping the program
3 because without a government sponsor, there's no
4 way for lenders and, therefore, potential home
5 buyers to access the program. You have to have a
6 government sponsor. And so we were looking at
7 the possibility of revamping the program, but
8 over in that time the Department of Planning, you
9 know, we've lost people. We don't necessarily
10 have the capacity to administer fully the program
11 inhouse.

12 And so when we started considering
13 what -- how we could do it and the administration
14 is this, on the front end it's assisting with the
15 marketing. And it is helping to administer the
16 buyer education which is a requirement of
17 participating in the program. You have -- if you
18 are a first-time home buyer, you have to go
19 through borrower education. So that's the front
20 end kind of administration.

21 And then it's also kind of making sure
22 all of the closings are documented and working
23 with -- to make sure that we have the appropriate
24 documentation at closing and attend the closing,

Chicago Infrastructure Trust Meeting - January 27, 2016

1 deliver the checks, things like that. So that's
2 the front end administration.

3 There is also back end administration
4 because as Leslie alluded to, it's up to a 7
5 percent loan that over time becomes a grant. And
6 so there's certain compliance that needs to be
7 done over the course of the loan to make sure
8 that we have met all the requirements so that the
9 loan can go to a grant. The lender, the
10 servicer, do some of it; but the government
11 sponsor is responsible for doing some of it.

12 And so we thought to some extent the
13 trust could be the agent for the City as the
14 government sponsor for this program to do that
15 work.

16 MR. PASKULIN: And as the -- as you may have
17 seen references to George K. Baum & Company as
18 the program administrator, we are in a position
19 to fulfill all those roles as the program rolls
20 out. Do all the front end, the training, the
21 recruiting of the lenders, the coordinating, the
22 -- the -- all of the recording. And then, of
23 course, over time if CIT would like to hire
24 someone to look at what we do and take on those

Chicago Infrastructure Trust Meeting - January 27, 2016

1 responsibilities, you have a ramp up time or a
2 period of time in which to accept those
3 responsibilities.

4 So we could certainly proceed with the
5 program as is. Our role being defined as the
6 program administrator, but over time that's
7 something that based on what is the appropriate
8 responsibility that can be transferred over to
9 your staff.

10 CHAIRMAN SUMMERS: Can you guys talk a
11 little bit about just what historical volume was
12 and how to think about kind of magnitude and size
13 and how that may or may not be impacted by rate
14 movements, etcetera?

15 MR. FRATTO: Just so everyone knows Marc
16 Paskulin is the head of the housing department
17 with George K. Baum and Al and I work in the
18 Chicago office; but go ahead, Marc.

19 MR. PASKULIN: And as Tony mentioned we have
20 been working with the City since 1995. The last
21 time the City had a successful single family
22 housing down payment assistance program was in
23 2006, 2007. The City was issuing tax exempt
24 bonds at that time. The bond financing traded a

Chicago Infrastructure Trust Meeting - January 27, 2016

1 lower loan rate or a rate that was close to
2 market and down payment assistance. So the
3 culmination of two was very appealing.

4 We started off with six lenders; the
5 usual suspects, Chase, Wells Fargo. And after 2
6 years we ended up with 35 lenders. All those
7 initial lenders didn't do very well, but we had
8 the guaranteed rates and prospect banks and all
9 the banks did very well. And then, of course,
10 the market slowed down. The financial meltdown
11 came by and we couldn't issue a tax exempt bond
12 at all. Certainly not at a competitive rate with
13 the mortgage market.

14 Now, there have been programs since
15 then sponsored by the U.S. Treasury for example.
16 The U.S. Treasury required some ongoing reporting
17 requirements from each housing finance agency or
18 each government in order to participate in those
19 programs and the City of Chicago could not abide
20 by those conditions. So the City of Chicago has
21 not participated in any kind of a tax exempt bond
22 program since 2007.

23 MR. FRATTO: And there are no bonds involved
24 here.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 MR. PASKULIN: As far as volume about 175
2 million in 2006. Another 150, 160 million in
3 2007. And another 50 million or so in 2008
4 before the market tanked. So there is
5 considerable amount of volume.

6 In the past it has been roughly 10
7 million; 10, 15 million per month. We have a lot
8 of local governments in other states that have
9 done this kind of a program. We think
10 counties -- cities and counties with a comparable
11 population should be, you know, 5 or 10, 5 or 10
12 or 15 million per month.

13 So we have provided some numbers to
14 the staff and based on the per loan fees, they
15 know exactly what they can expect.

16 CHAIRMAN SUMMERS: Given that this new
17 program doesn't have a rate subsidy component the
18 way the previous one did, is there any impact to
19 rate movement? Is it still -- you know, would it
20 still apply if rates are higher, folks are still
21 looking for kind of more relief?

22 MR. PASKULIN: That's a very good question.
23 When rates are this low, whether it's a 4 percent
24 loan with no assistance or a 4.50 or 4.75 or the

Chicago Infrastructure Trust Meeting - January 27, 2016

1 4 percent grant; it really doesn't impact the
2 ability of the home buyer to qualify.

3 CHAIRMAN SUMMERS: Right.

4 MR. PASKULIN: It does become an issue when
5 you're at 6 or 7 percent and that's when
6 tax-exempt bonds have flourished when that gap is
7 there. Right now there is no gap. So I can't
8 tell you -- I can't tell you where rates are
9 going to be a year or two years from now, but
10 right now this program is doing exceedingly well
11 in many states because of the interest rate
12 environment. Because even at a higher than
13 market interest rate then that -- that
14 assistance, that grant, that cash close is really
15 the driving force behind the program.

16 So right now if rates stay at these
17 historically low levels, we expect very, very
18 good performance. When the interest rates rise,
19 we'll have to check in with the program and look
20 at tax exempt bonds and look at some other
21 alternatives.

22 MR. FRATTO: Just as a point of information
23 when we were doing the last programs in 2005 and
24 '06, it was like 51 percent was in non-targeted

Chicago Infrastructure Trust Meeting - January 27, 2016

1 areas and 49 was in targeted areas. So that's
2 how -- and if you look at a map, it was pretty
3 well spread out except the 43rd Ward. We didn't
4 understand.

5 CHAIRMAN SUMMERS: Something tells me 19 and
6 24 are going to be well covered.

7 MS. HUBBARD: If I read this correctly, I'm
8 sorry, the fees that the trust will get are tied
9 to the interest rate of the participant; is that
10 right? So that if they are charging -- the
11 lender is charging four-and-a-quarter, that
12 quarter percent might be coming back to --

13 MS. BROWN: There is a spread above market.
14 And the spread above market is what's used to pay
15 the administrative costs and the servicer and so
16 the trust would be paid out of that spread.

17 MS. HUBBARD: And is that going to be
18 standard across all the lenders?

19 MS. BROWN: Yes, the spread will be.

20 MS. HUBBARD: Okay.

21 MR. PASKULIN: And from that spread your fee
22 will be the same regardless of which loan rate is
23 chosen, whether it's a lower loan rate or a
24 higher loan rate with more assistance; your rate

Chicago Infrastructure Trust Meeting - January 27, 2016

1 is still the same or your spread is still the
2 same.

3 MR. LINGENFELTER: Let me ask an entirely
4 different question for maybe a different take on
5 -- at its peak like how many individual
6 homeowners are we helping?

7 MS. BROWN: So in 2006 it was just over 1600
8 homeowners that participated. In 2007 it was
9 just over 1700.

10 MS. HUBBARD: And then is the City and the
11 Trust when I read through this; the
12 indemnification, is that one in the same because
13 they mention the City being --

14 MS. BROWN: You know what, we haven't
15 negotiated the documents. There will be an
16 agreement between the City and the Trust. There
17 will be an agreement for the City with to -- for
18 the program and we just haven't negotiated that
19 yet.

20 So I think what Leslie is asking you
21 is for authority to negotiate and enter into
22 those agreements. And then once we've executed,
23 once you guys have approved, once we've -- City
24 Council has approved; I think we can come back

Chicago Infrastructure Trust Meeting - January 27, 2016

1 and report out kind of what the general terms of
2 our agreement are and the final parameters of the
3 program.

4 CHAIRMAN SUMMERS: You know, the resolution
5 states to authorize Leslie to negotiate with the
6 Chair's approval. So there will be
7 representation from the board in that process.

8 MS. DARLING: And you'll get -- as a board
9 member or the entire board will get all the
10 documents as we go through and, you know, what
11 the resolution says. And if Scott wants to add
12 anything to this is just I am being given the
13 authority to negotiate it. Obviously I will be
14 doing that with counsel.

15 I have Scott Falk from Kirkland. And
16 so I expect the negotiation will be relatively
17 simple and easy, but I will also make sure that
18 you are all apprised in realtime as we move
19 through that process. So there won't be any
20 surprises. You will have an opportunity to see
21 the documents prior to.

22 MS. BARRETT: Question, prior to 2007 was
23 the government sponsored by the Department of
24 Housing?

Chicago Infrastructure Trust Meeting - January 27, 2016

1 MS. BROWN: Well, it was still the City. It
2 was the City, but it was administered through the
3 City Department of Housing.

4 MS. BARRETT: And was reinstatement in the
5 housing division a part of planning development
6 of that function contemplated?

7 MS. BROWN: Yeah, we looked at it. I mean,
8 it was always a program that was kind of dually
9 administered from an internal standpoint with the
10 Department of Housing and Department of Finance
11 at the City. Especially when there was a robust
12 tax exempt bond component to it.

13 But one of the things that we
14 consistently have tried to do with the
15 reconstitution of the Infrastructure Trust is to
16 leverage those synergies. And we thought that,
17 as Leslie noted, housing is an important
18 component of infrastructure of the City. And so
19 it made sense. And it helped with our own
20 internal capacity issues. But also it helped
21 with two things, candidly if the program is as
22 successful as it was in the '90s, it creates a
23 self-funding source for the Trust which is --

24 MS. BARRETT: Part of our strategic plan.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 MS. BROWN: Yes, that's one. But the other
2 is that as you start to or continue to evaluate
3 projects, we're hopeful that the Mayor's focus of
4 investment in the neighborhoods will be a
5 priority that the Trust embraces. And so we felt
6 like the synergy with housing and housing
7 throughout the 50 wards would help to inform
8 future project evaluation and selection by the
9 Trust. So that was kind of our thought.

10 MR. SILVERS: You mentioned the program ride
11 up during the crisis. Were there any -- just
12 thinking about the technicality of the housing
13 markets, were there any other consequences for
14 the City as the sponsor during the crisis with
15 foreclosure rates and so forth?

16 MS. BROWN: No, the actual -- and I don't
17 have it all and George K. Baum may. But if you
18 look at the performance of loans of the portfolio
19 from our program, it was generally very good. So
20 we weren't any more exposed to the housing bubble
21 in the foreclosures than I think any other
22 program. And so and generally we perform -- our
23 loans performed pretty well. So not -- it was a
24 program that the City liked. It was not a

Chicago Infrastructure Trust Meeting - January 27, 2016

1 program that exposed the City to undue loss.
2 And, in fact, we are just done kind of closing
3 down in some of the escrows that were still
4 around from that time in the City and it also
5 created -- I wouldn't characterize it as a
6 windfall, but it created some additional resource
7 for the City.

8 MR. FRATTO: One of the other things if I
9 may for the program at that time and for this
10 program also, the things that make it more solid
11 in terms of financially and the potential for --
12 for foreclosure, is not as much as in some of the
13 other areas in the country. They're for 30-year
14 loans. There's no -- there's no nondocumented
15 loans. There's -- at some point when you get
16 your loan, you have to have certain -- a certain
17 FICO score. And so those were all in place
18 before and they are still going to be in place.
19 So that's why the performance of all those loans
20 weren't as bad as what happened throughout the
21 country. And we have a home buyer education
22 component to this. So that's an important thing.

23 MR. O'SHEA: Based on the fact that George
24 K. Baum has administered these programs other

Chicago Infrastructure Trust Meeting - January 27, 2016

1 times, other places based on past experience; how
2 long do we think it will take before this program
3 is self-sustaining?

4 MS. BROWN: It starts out being
5 self-sustaining. I think in my briefing I was
6 not as clear with you all. But the -- the lender
7 is required to reimburse I guess is the best
8 word, reimburse the City within 30 days of the
9 loan closing the down payment. So it starts out
10 being self-sustaining.

11 So the seed really is we have to show
12 for certain loans the sponsor has to show a level
13 of reserves. So the seed money is for that. And
14 then it's for that first start up, certain
15 start-up costs; but the cost of the loans will
16 immediately start funding back or the cost of the
17 down payment, excuse me, will immediately start
18 funding back to the City 30 days after a close.
19 So if we do a loan with a \$10,000 grant, 30 days
20 after close the lender has to send the City back
21 \$10,000.

22 CHAIRMAN SUMMERS: Any other questions on
23 the home buyer program?

24 MR. O'SHEA: I would just like to say like

Chicago Infrastructure Trust Meeting - January 27, 2016

1 everything we have been talking about the last
2 hour-and-a-half, this is going to be huge. This
3 is going to be huge in low income communities.
4 This is going to be huge in middle class
5 neighborhoods. And I just want to thank Carol
6 for all the time you've put into it and Leslie
7 for your leadership. I can't wait to get back to
8 my neighborhood and talk about this. This is --

9 MS. BROWN: I would just add one thing. The
10 Mayor did an event earlier this week and where he
11 announced that we were going to start working on
12 this program. And as we were walking out, one of
13 the police officers who was doing security there
14 stopped me and said, now, when can I get -- I
15 said, hold on. Give us a month or two, but then
16 we'll be ready.

17 MR. O'SHEA: This is how we are going to
18 rebuild neighborhoods that suffered the last ten
19 years.

20 CHAIRMAN SUMMERS: I'm sure your office,
21 Alderman, and, you know, we have been flooded
22 with calls since Monday. Where do I sign up?
23 How do I sign up? Hold on.

24 MS. BROWN: And one more thing I forgot to

Chicago Infrastructure Trust Meeting - January 27, 2016

1 mention or maybe I did mention it, it's been a
2 long day. One of the things that we are going to
3 do as soon as -- once City Council acts and once
4 we get approval, is we will do a series of
5 informational sessions throughout the City for
6 potential home buyers so they understand kind of
7 how they can access the loans, condition of the
8 loan and things like that. So we are going to
9 try and do as much as we can to build up the
10 program.

11 MR. SCOTT: I would like to say to echo my
12 colleague's sentiments. You know, the
13 neighborhood in which I serve is in desperate
14 need of a program like this. We have over I
15 would say we probably have the largest
16 concentration of vacant lots. With -- in a great
17 location where I have developers that want to
18 develop, but want to make sure that we have the
19 ability to bring in qualified homeowners that
20 will be there for the duration of the 30-year
21 loan so they are not taking a bath on it. And
22 something like this, again, your leadership on
23 this program is going to do great things for my
24 neighborhood and other neighborhoods just like

Chicago Infrastructure Trust Meeting - January 27, 2016

1 CHAIRMAN SUMMERS: Any opposed? Great.

2 MS. DARLING: Thank you so much. So I
3 realize that we are swiftly running out of time
4 and I want to be cognizant that we scheduled two
5 hours for the meetings and I thought that would
6 be well more than enough, but I think it's, you
7 know, we have had such terrific conversations.
8 So I'm so thrilled that you are so engaged in the
9 work that we are doing.

10 So just to sum up perhaps some of you
11 have seen a lot of press about this. There's
12 been a number of stories recently and a number of
13 announcements made by the Mayor's office and the
14 CTA about the completion of the 4G being
15 implemented in the City's subway system. It was
16 -- there were two announcements. One that the
17 treasurer and I were at before the holidays and
18 then one much more recently. One to celebrate
19 the completion of the red line 4G implementation
20 and one to celebrate the completion of the entire
21 system in the blue line.

22 So there is now 4G in all of the
23 subway tunnels throughout the City. And that
24 project as you know was brokered by the CIT. It

Chicago Infrastructure Trust Meeting - January 27, 2016

1 was the \$32.5 million agreement fully financed by
2 the wireless carriers. And to say that people
3 are very happy about it is an understatement.
4 There were tons of quotes from all kinds of
5 people who were thrilled about the program and
6 able to text their friends and relatives that
7 they're coming home or meeting them out. And
8 people are very happy with the increased user
9 experience, the interconnectivity and -- adds to
10 the safety of our underground system.

11 So as you all know that was a project
12 that was implemented before I started at the CIT.
13 But we were pleased to see it come to completion
14 and we do think it is a hallmark project of the
15 kind of thing -- it's the exact kind of project
16 that the CIT can be integral in bringing people
17 together, both private industry and public
18 agencies to get projects done.

19 MR. FALK: Can I make one observation just
20 for the board. You might wonder what -- what
21 does the CTA need the CIT for. The reality is
22 have you ever tried to get four cage match
23 competitors like Verizon, AT&T, Sprint and
24 T-Mobile in -- to get agreement on any project?

Chicago Infrastructure Trust Meeting - January 27, 2016

1 It takes more than a cat herder. It takes like a
2 ring master.

3 And so the role that we played
4 principally was to get everybody to see why it
5 was a win win for CTA and for commuters and for
6 the carriers. And, you know, there was a lot of
7 -- the CIT was able to do was crunch a bunch of
8 numbers and show that, you know, based on
9 historic usability, the ability for a commuting
10 phone user to stay connected during the entire
11 duration of his or her commute meant that much
12 more loyalty attribution to the carrier.

13 So it actually -- and this had never
14 been done before anywhere in the country. And
15 New York is now starting I think. But, you know,
16 so it was the first time these guys were ever
17 brought together. And that's really what the CIT
18 was able to do in a way that none of the carriers
19 were -- there was no one agent within the
20 carriers willing to carry that weight.

21 MR. SILVERS: Can I just add to what you
22 just said. The FLCI owned company by
23 infrastructure at a national level has made the
24 point over and over again that there's a suite of

Chicago Infrastructure Trust Meeting - January 27, 2016

1 experiences that business travelers have in the
2 top cities of the world. And that suite, which
3 includes mobile phone and broadband access,
4 high-speed rail connects and low delay at the
5 airport; that suite is not available anywhere in
6 America.

7 This is a -- this is the first step
8 that I know of by a major city in the United
9 States to make that suite available. And if we
10 are going to be competitive as a nation with the
11 world's business centers outside of the United
12 States, we've got to have this. And so hopefully
13 the Trust is making this point that this is --
14 this is a big deal. A bigger deal than it --
15 it's wonderful for the citizens of Chicago to be
16 able to text that they're coming home, but this
17 means in the long-run, jobs.

18 MS. DARLING: Thank you for making that
19 point. So if there are no other questions about
20 4G, I just briefly want to address what's coming
21 up.

22 In addition to all the projects that
23 we have talked to today, I have been working very
24 hard at refocusing the CIT's efforts on serving

Chicago Infrastructure Trust Meeting - January 27, 2016

1 our main clients which as the City Council
2 created us, we believe that our first client
3 should be the City and her sister agencies. And
4 so I have spent a great deal of time meeting with
5 sister agency heads, their staffs and many
6 department heads at the City of Chicago to
7 determine what other opportunities might be
8 available for us at the CIT and how the CIT can
9 be increasingly helpful to the City in any way
10 that we can.

11 You know, one of the things that came
12 out of the discussions was the home buyer
13 assistance program. So I am pleased to let you
14 know that we are making a lot of progress. We
15 are looking at projects in bullets that are --
16 that you see before you. So energy efficiency,
17 we think that there is a high likelihood of a
18 Retrofit Two in the CIT's future.

19 We have been talking to the Department
20 of Aviation -- this is just illustrative, but we
21 have been talking to the Department of Aviation.
22 We have been talking to MPEA. They -- CPS, they
23 have very large needs for energy efficiency. And
24 with George on board, those are things we know

Chicago Infrastructure Trust Meeting - January 27, 2016

1 how to do. We have a lot of learnings from
2 Retrofit One that we feel like we can apply to a
3 much broader and larger retrofit team. So we
4 look forward to working on that in the coming
5 months.

6 We are looking at underutilized assets
7 whether they be real estate, working with the CTA
8 to look at transit oriented development and what
9 our opportunities are there. That is something
10 that Tom has also helped us look into.

11 I've worked with Tom Powers to try and
12 make some determination about whether there are
13 opportunities for us at the water department.
14 They have a lot of access to very cheap money
15 through the state revolving fund. So in the near
16 future that may not be an option, but it is
17 something that we feel is worth looking into and
18 we are continuing to look into that. And then
19 tying the underutilized assets also into
20 transportation options and the fast bills that
21 congress recently passed, a transportation bill.

22 In that transportation bill was a
23 small section that references infrastructure
24 accelerated programs. And delineates \$12 million

Chicago Infrastructure Trust Meeting - January 27, 2016

1 in grant money that could be available for
2 infrastructure accelerators and regional
3 infrastructure accelerators of which I feel the
4 CIT is a perfect example.

5 I have been working in collaboration
6 with other infrastructure accelerators throughout
7 the county. They are starting one in D.C. they
8 have one in Denver. And so some of you may have
9 heard about some of those projects, but I've been
10 collaborating with my colleagues in those other
11 states in Washington D.C. to learn more about the
12 opportunities there. We don't think that those
13 funds are going to be available in the very near
14 term, but we think that they will be appropriated
15 and I hope that we will have an opportunity to
16 compete for that grant. I think we will be very
17 competitive.

18 So that's just a really brief update
19 because I want to be mindful of people's time and
20 I hope we will have more to talk about at our
21 next board meeting.

22 CHAIRMAN SUMMERS: Great. I know we have
23 the general resolution. Is this --

24 MR. FALK: We passed every resolution --

Chicago Infrastructure Trust Meeting - January 27, 2016

1 sorry, I apologize, Mr. Chairman. Yes, we will
2 just deem it to be adopted as part of --

3 CHAIRMAN SUMMERS: As part of the others?

4 MR. FALK: Yes.

5 CHAIRMAN SUMMERS: Yes. Now, I think we --
6 it's time for public comment period. I don't
7 know if anyone is here for public comment. Yes.

8 MS. FISCHER: Hi, my name is Audrey Fischer.
9 And I'm a representative for the Chicago Area for
10 the International Dark Sky Association. I'm
11 President of the Chicago Astronomical Society,
12 the oldest astronomical society in the western
13 hemisphere. And I'm founder of One Star at a
14 Time, a project that is endorsed by ASCO
15 (phonetic) in which I'm the chairman for the
16 international conference coming up in July.

17 My -- I am totally stoked about the
18 opportunity that we could totally relight the
19 City. And what the vision I really hope that you
20 understand is that you have the potential, we
21 have all -- we have everything we need to restore
22 starlight over the City by keeping the light out
23 of the night sky, stopping light trespass in
24 people's bedroom windows and by forbidding the

Chicago Infrastructure Trust Meeting - January 27, 2016

1 blue light component to be used in the LED
2 lights.

3 The bright -- the blue light has been
4 proven to be the most destructive to the human
5 circadian. I know the top researchers in the
6 world on circadian disruption and cancer, for
7 example. Not a single streetlight is documented
8 to -- if it enters the room of a bedroom window
9 of a sleeping person that happens to be a cancer
10 patient -- and I have a cancer history. I was
11 fortunate to beat it for decades now, but not
12 only is it proven to increase the risk of
13 particular cancers, it is now proven to -- to
14 stop the ability for the chemotherapy drugs to be
15 effective. So not only will it increase the
16 risk, but it interferes with the progress of the
17 patient.

18 This is -- so one thing that this is
19 under control of the City Lighting Code. Right
20 now it's mandated in the City of Chicago that the
21 streetlights must shine from the street light
22 fixture to the keyhole of the front door. This
23 was well intended, but decades ago we didn't
24 understand the human -- the consequences of

Chicago Infrastructure Trust Meeting - January 27, 2016

1 circadian disruption and what that light can do.

2 So if we can forbid any lighting now
3 for light trespass, if it's a street light it
4 ought to light the street. It not ought to
5 trespass into people's bedroom windows or
6 properties. If the owner of a building wants to
7 light their own front porch, they can do that.

8 And the other thing about the blue
9 light component of the LED's is that it -- it
10 scatters more, it's that raw line scattering in
11 the light. That's why we have a blue sky during
12 the day. That blue light -- that blue light can
13 increase our sky globe by a factor of five. So
14 right now we can go 100 miles away from the City
15 of Chicago and see the glow of the City over 100
16 miles away.

17 If the LED's are allowed in above the
18 540 nanometers range, you will see Chicago sky
19 level 500 miles away and this is well documented.

20 CHAIRMAN SUMMERS: Miss Fischer, can I ask
21 that -- I appreciate your comments. Can I ask if
22 you have any sort of written documentation.

23 MS. FISCHER: Sure, I have 1,000 documents
24 and I know most of them by heart.

Chicago Infrastructure Trust Meeting - January 27, 2016

1 CHAIRMAN SUMMERS: Fantastic. If you can
2 provide that in writing to Leslie and the staff
3 for us to make sure we appropriately consider. I
4 appreciate your comments today and what we want
5 to be mindful of everyone's time given the time
6 that we allocated, but thank you for raising this
7 issue and hopefully you can follow up with
8 Leslie.

9 MS. FISCHER: Sure, but just to realize with
10 the new installation we can either -- we have the
11 potential of making -- the documented City -- we
12 are the most lighted city in the world, published
13 that way. We can make it five times worse or we
14 can be the first city in the world, the first
15 major city in the world with starlight and a
16 healthier city.

17 But the Chicago -- the National Park
18 Service, this is their centennial this year, has
19 published reports that by 2025, 90 percent of
20 people in the world -- 90 percent of the people
21 in the United States will never see starlight
22 even once in their lifetime because of
23 exponential expansion of light pollution. And
24 now that we have the -- now that we understand

Chicago Infrastructure Trust Meeting - January 27, 2016

1 the health consequences not only for humans, but
2 ecology, we can't allow that to happen.

3 CHAIRMAN SUMMERS: I appreciate that and I
4 think you are raising the issue which is
5 informative to all of us at exactly the right
6 time. So thank you very much.

7 MS. FISCHER: Thank you. Who should I send
8 it to?

9 CHAIRMAN SUMMERS: To Leslie Darling.

10 MS. DARLING: I will give you my contact
11 information.

12 CHAIRMAN SUMMERS: Thank you. Are there any
13 other public comments?

14 MAN IN GALLEY: Do you take questions as
15 well?

16 CHAIRMAN SUMMERS: Comments.

17 MAN IN GALLEY: Comments only.

18 CHAIRMAN SUMMERS: Do you have one?

19 MAN IN GALLEY: No.

20 CHAIRMAN SUMMERS: I don't know that we had
21 a need for anything for executive session.

22 MS. DARLING: No, I don't think so actually.

23 CHAIRMAN SUMMERS: Scott. So if there is
24 from this nothing else, I am happy to entertain a

Chicago Infrastructure Trust Meeting - January 27, 2016

1 motion for adjournment.

2 MS. HUBBARD: So moved.

3 CHAIRMAN SUMMERS: Moved by Miss Hubbard,
4 second by Secretary Treasurer Lingenfelter. All
5 in favor.

6 (Chorus of ayes.)

7 MS. DARLING: Thank you all for your
8 participation today.

9 CHAIRMAN SUMMERS: Thank you. Thank you,
10 Leslie.

11 (Whereupon the meeting
12 adjourned at 3:31 p.m.)
